# FRIENDSHIPS MUST NOT SWERVE A SCHOOL DAYS

TWENT once in awhile sumething develops to show just the while skinwed the public really it.

You may agree with a man all the time and you are a fine fellow. Disagree with him publicity, no matter him is peculiarly true of the newspaper business. Advects what a man likes and you are his friend and he cannot say tan much for you. Disagree with him and you must be the biggest thing in any city, for it is a sacred new all wrong. The real newspaper is never swerved from its path of daty, however, by criticisms of its action.

It is the duty has come when a newspaper and altar an which every citizen may lay his contribution to the right and stay there. The honest arwapaper Of Commerce.

Everpaper does this.
The housest newspaper is not swerved by personal affili-

The housest newspaper is not swarved by personal affiliations nor friesdatings, nor by business pressure nor associations. There is as much of seciprocity in businerse lines that the husiness man frequently cannot understand this when he cannot bring a newspaper to hit way of thinking, he is too agd to think it a personal matter. He is unable to understand that the mutual give and take of business cannot be permitted to enter into the conduct of a newspaper.

The newspaper has a duty to its emberribers. It agrees to give them all the news. When it suppresses news to startely the whim of a friend, either for business or personal reasons, that paper is emberaling from its readers is hat reader their must come first. The duty to the reader is the first duty of the paper, for, without the confidence of the reader, the worth of a newspaper is destroyed. It becomes an eggan instead of a newspaper is destroyed. It becomes an eggan instead of a newspaper is destroyed. It becomes many cannot consecute the confidence of the reader, the worth of a newspaper is destroyed. It becomes an eggan instead of a newspaper is destroyed. It becomes an eggan instead of a newspaper is destroyed. It becomes the confidence of the reader, the worth of a newspaper is destroyed. It becomes the confidence of the reader, the worth of a newspaper is destroyed. It becomes an eggan instead of a newspaper is destroyed. It becomes an eggan instead of a newspaper is destroyed. It becomes the confidence of the reader is the reader to expend the confidence of the reader is the many change of the reader in the newspaper husiness.

A newspaper gave to many thousands of subscribers, all of whim disagree on a some things and no two of whom agree on everything, even the fundamental grinciples of politics, religion and economics. No newspaper can every hear a man representing advanced likes in reader to a gree with it at all times. So there is but one thing a newspaper and the observable of the community, the state may be desired. The formal politics have

Semetimes the that and the nation.

Semetimes the tharge is made that newspapers are diministed by their solvertisers. This falls flat on investigation. Every large daily manyapaper has hundreds of advertisers who represent every economic interest in the gation. Every have daily answapaper has hundreds of adverticers who represent every examic interest in the same degree as the interests of the individual subscriber. The business interests of any city do not as a rule attempt to levy petty requirements on the newspapers and they could not be respected if they did, and the paper that permitted it would not be its influence. Very naturally the business interests of any city do not as a rule attempt to levy petty would not be its influence. Very naturally the business interests of a city would oppose a radical and farguant policy of airach on the part of the newspapers which would not district any of the integrity of hanks. Nobody would or should expect them not to oppose and a policy as this would expect them not to oppose and a policy as this business interests do not dominate and contractive policy, in business interests do not dominate and contractive policy, in business interests do not dominate and contractive policy, in business interests do not dominate and contractive policy, in business interests do not dominate and contractive policy, in business interests do not dominate and continuence in the future for whatever it along the to be for potential and states. Personal friend they are all influence have no place in the canduct of the heavy how me applicables were will get very far by considering it as personal matter were an exception and to the common wollars, to the public around and to heavy far by considering it as personal matter were an exception and to the common wollars, to the public around and to legitimate interests. Personal friend things and influence have no place in the canduct of the heavy house, rightly conducted in which the people have faith, in say nothing of walking 100 miles to do it, is absenting the dispatch the interest by the same and others.

bever will get very far by considering it a personal matter when a newspaper takes a stand for the light. A newspaper, rightly conducted, in which the people have faith, is lightly conducted, in which the people have faith, is lightly conducted, in which the people have faith, is newspaper, honestly conducted with it. Men come and go, but newspaper, honestly conducted, go on forever, supported and praised by their readern. The faithless newspaper soor falls, like the man who allows himself to be swerved by parastal prejudices and friendships.

In developing a more admittive world consciousness the American newspaper must blace the trail. It is the peculiar duty of the prem to be the jublic consciousness the line duty of the prem to be the jublic consciousness the lametons as large as ours, wherein an assembly of all the people is a physical impossibility, social consciousness the hast that it in its special public, betraye that public just as truly as a diseased mind sets pitfalls for the body Ged man given it to direct.

No body in England, it neems, wants to be ambassador to the United States certainly needs a he-man far leader as we have never needed one before.

Bryan works on the theory that most of the people as indince persistence more than neverty.

After all, Finne is probably the best judge of who she will assembly as a diseased mind sets pitfalls for the body Ged man given it to direct.

No www. met only has a pingle track mind, but it runs on the control of the probably needs the income.

No body in England, it neems, wants to be ambassador to the United States certainly needs a he-man far leader as we have never needed one before.

Bryan works on the theory that most of the people as we have never needed one before.

W. W. not only has a single track mind, but it runs on Newspapers must keep the faith with their people. To do this they conserve and work over into palished arcumplishment what has been gleaned of good in the past, and the newspaper must leed, not follow. A great man once and he would nother leed in a country that was governed by its newspapers than is once in which their were no newspapers. The reason why it is note to trust the public's affairs to an honest prespace to because not the owners.

Less on exterior things than most suppose.

W. W. not only has a single track mind, but it runs on the block system.

Speaking of Bryan, wonder what he would do if he fill."

Happiness depends, as nature shows, Less on exterior things than most suppose.

With a lock system.

An Encouraging Reward.

William a int of heavy to an entire a feet the many their we heard them when their backs were to the wall.

With money and with blood we've paid the prices, list they fell us we are selfish, after all.

We drapped all else, risked everything to save them.

We left the ensy way and took the rought. Truth all me had in give we generously We set surselves no Hadt and segment the they seem to think we haven't they seem to think we haven't the Drenzy that we thought we done enough.

WHEN lunger and defeat and fear had lead them to falter and confess the doubt they had, we worked to them, we fed them, we worked to them, we fed them, They accepted all we offered and were glist? They didn't ask for terms or built at credit, They mentioned no conditions or descanded. They do not vered, as we had and said it. Not hatering, but holding out their hands.

The self-made man usually thinks he is the only one who could have some it in just that way.
